Read & Replace

Here are some more roots to add to your collection. The root gen at the beginning of the word gender means birth. The root nat in the middle of the word supernatural means born.

READ the diary entry. FILL IN the blanks with keywords.

gender gene generation generous innate
nationality native natural regenerate supernatural

Dear Diary,					
My lab experiment was a success! I was finally able to combine					
the 1 of a pig with one from an iguana. The iguana,					
a 2 of South America, is able to 3					
body parts. The pig is an animal that has 4					
intelligence. The new creature, which I call a piguana, makes a					
great pet. It is smaller than a pig, but it's very smart. If it gets					
hurt, it can regrow a new part. Soon I'll be able to offer them to					
pet shops in either 5 — male or female. I am excited					
to be a part of a 6 of scientists who are doing					
creative lab work. But I couldn't have done this without the					
help of my assistant, Igor. Some people have					
called the piguana a monster. They say we have used					
powers to do our work. Perhaps it is					
because of my Transylvanian 9					
But these claims are untrue. It is					
completely 10					
to want to push science to its limits.					
Dr. Frankenfeld					

Root It Out

READ each definition. WRITE the missing root letters in the blanks.

10. To regrow or give **birth** to a lost part: re ____

HINT: Some roots have alternate spellings.

$$gen = birth$$
 $nat = born$

	gender gene generation generous innate					
	nationality native natural regenerate supernatural
